

SAVE TIME AND MONEY

USE IMAGING CENTERS

DID YOU KNOW?

Your Imaging tests, like an X-ray, CT scan, MRI or ultrasound can cost up to 30 percent more at the hospital than at an imaging center?

So when your doctor orders an imaging test, consider going to an imaging center to save money. Using imaging centers can also save time because these centers are often more convenient, and you won't wait as long for your test. In some cases, you can even get your results the same day.
