

Meeting Date	Site	Meeting Location	Name	Employee Type	Organization, Agency or Employer	Subject of Concern	Comments
9/22/2015	DelTech Stanton Campus	Newark	Bill Biordi	Vendor	RBS	Prescriptions	Recommend an audit to make sure there's no conflict of interest for the PBM. Drug spend is where they can help the State. If the State of DE would have an audit of just the drug spend, confident would find savings. Anytime you have two companies merging as with Express Scripts and Medco, will operate on legacy system and have administration issues; something could be found with an audit. An audit will at least find unfound money.
9/22/2015	DelTech Stanton Campus	Newark	Susan Gosney	Active	NCCVT Education Association	Prescriptions	I am on NCCVT Executive Board. Members have voiced their opinion on the price increase. Some are for quality of life while other prescriptions can be of dire medical emergencies. Epi pens went up 50%, Inhalers increased; these prescriptions can be life. \$40 to \$800 for Viagra & Cialis; these are good for a quality of life. Asks the Task Force to re-examine prescriptions that have had such increases. Redefine which medicines will stay with the increases and those that will not.
9/22/2015	DelTech Stanton Campus	Newark	Mike Matthews	Active	Red Clay EA	Health Plan	I am President of the Education Association for Red Clay School District. Employees that work for the State trade off higher salaries for , better benefits. The State needs to make good to make sure our members, really hard working folks, are getting the benefits they need to sustain themselves through lower salaries when they could be making more in private industry. He urges the Task Force to have discussions with legislators on increasing personal income tax for those making more than \$60,000 a year because the folks this will hurt the most with healthcare plan changes are the people that have the least.
