Institutes of Excellence Transplant Facilities

The Aetna National Medical Excellence Program coordinates care and provides access to covered transplant treatment through the national Institutes of Excellence™ network. We have selected hospitals that have met extensive quality, as well as cost-effectiveness criteria to participate in our Institutes of Excellence Transplant Facilities for solid organ transplants and bone marrow transplants. These facilities have been contracted on a transplant-specific basis and facilities are considered participating only for the transplant type listed in this directory.

To be considered in network for coverage for transplant-related services, including evaluation, transplant, and follow-up care, you must utilize an Institutes of Excellence participating facility that has been specifically contracted by Aetna for your transplant type. Services must be preauthorized with Aetna for coverage to be effective. Any facility that is not specified as an Institutes of Excellence network facility is considered nonparticipating or nonpreferred for transplant-related services, even if they are considered participating for other types of services.
